AXON Fleet 3 Training

02-02-2024

On 01/31/2024, PSIT and Axon began installing the new AXON Fleet 3 in-car cameras in all patrol vehicles. This process will take approximately two to three months to complete.

Prior to operating a vehicle equipped with the Axon Fleet 3 ICC, ensure that you review the accompanying Axon Fleet 3 Training presentation – Available on AMS [[AXON Fleet 3](#)].

Major changes include, but are not limited to:

1. Axon “FLEET Dashboard” will replace the “Fleet XL” application on MDCs.
2. Fleet 3 cameras have integrated License Plate Reader (LPR) technology and users are required to acknowledge LPR hits (e.g., *Correct, Incorrect, or Review*).
 - LPR scans are stored in Evidence.com and accessible via Flock Safety.
 - Contact the RTIC for Flock Safety account access and training.

Review the Axon Fleet 3 Training presentation on AMS (*Reference Material, Other*) for all updates to Axon Fleet 3 [[AXON Fleet 3](#)].

If you have any questions about AXON Fleet 3, please contact the Mobile Sustainment Team.
